CS241 - Questions for Lab Assignment 7

1 INSTRUCTIONS

(1) This lab **is graded**.
(2) Use the attached files for this exercise. Note that the table "enrolled" includes grades.

2 QUESTION 1

Consider the following relations:

Student(snum: integer, sname: string, major: string, level: string, age: integer, total_credits: integer)
Class(name: string, meets_at: time, room: string, fid: integer)
Enrolled(snum: integer, cname: string, varchar:grade)
Faculty (fid: integer, fname: string, deptid: integer)

(1) Write an SQL **function** that returns the number of students enrolled in a course by a given instructor. Using this function, list the names of instructors who teach more than 1 student. Use SQL command line. [5 Marks for execution + 5 marks for viva]
(2) Write an SQL **function** that returns the number of students who have got an F grade in a given course. Using this function, list the names of instructors who are teaching a course for which more than 1 student has an F grade. Use SQL command line. [5 Marks for execution + 5 marks for viva]
